

MAHMOUD MOHASSEB

Technical Support Specialist | Cloud & Application Support | Operations & Incident Resolution

Location: Bucharest, Romania **Phone:** +40752331545 **Email:** Ghareb4@gmail.com
LinkedIn: linkedin.com/in/mahmoud-m-5b6824b6 **GitHub:** github.com/mahmoud-mohasseb **Portfolio:** mahmoud-ahmed.netlify.app

PROFESSIONAL SUMMARY

Analytical, Lean-certified Technical Support professional with hands-on enterprise experience supporting Microsoft EMEA service engagements, high-volume application ecosystems (Bolt / Arvato), and full-stack software debugging. Combines over 5 years of web application development (JavaScript, TypeScript, React.js, Node.js, REST APIs) with structured IT support operations, ticketing triage, and customer advocacy. Proven record in managing end-to-end incident lifecycles, executing systematic Root Cause Analysis (RCA), and collaborating with engineering teams under strict SLA benchmarks. Formalized training in Genpact Lean Digital Transformation and Anthropic AI Foundations, utilizing Value Stream Mapping and custom scripting automation (Google Apps Script) to eliminate operational waste, accelerate resolution speed, and optimize customer satisfaction.

TECHNICAL SKILLS & CORE COMPETENCIES

Enterprise Support & Incident Lifecycle: Tier 1/2/3 Technical Support, Incident & Problem Management, Root Cause Analysis (RCA), SLA & KPI Adherence, Ticket Triage & Prioritization, Queue Dispatching, Escalation Management, Microsoft Resource Tools.

Continuous Improvement & Lean Practices: Lean Digital Transformation, Value Stream Mapping (VSM), Workflow Waste Reduction, Process Standard Operating Procedures (SOPs), Kaizen, Operational Efficiency Optimization.

Web Technologies & Scripting: JavaScript (ES6+), TypeScript, React.js, Next.js, Node.js, Express.js, RESTful APIs, GraphQL, Google Apps Script, HTML5, CSS3/SASS, JSON, Webhooks, Microservices Basics, AI Prompting & Fluency.

Diagnostics, Databases & Tooling: Chrome DevTools, Postman (API debugging), Git & GitHub, MySQL, MongoDB, Advanced Microsoft Excel (Power Query, XLOOKUP, Pivot Tables, Dashboards), Microsoft 365.

Client Engagement & Communication: Technical Documentation, Knowledge Base (KB) Authoring, User Onboarding, Multi-tier Troubleshooting, Stakeholder Coordination across EMEA.

PROFESSIONAL EXPERIENCE

Content Operations Specialist & Lean Innovator — Genpact Feb 2024 – Present | Bucharest, Romania
Focus: High-volume incident review, policy compliance, Lean process automation, and platform reliability under strict SLAs.

- Enforce client-specific technical guidelines and policy compliance across digital video platforms, evaluating complex edge cases and resolving high-severity compliance incidents under strict turnaround SLAs.
- Isolate systemic workflow breakdowns and platform anomalies, documenting reproduction steps and liaising directly with tier-level engineering groups for swift bug remediation.
- Automated Weekly Business Review (WBR) reporting by developing a custom data visualization engine via Google Apps Script, eliminating manual data handling and reducing reporting cycle time by several hours weekly.
- Integrated Google Forms into Google Sites operational hubs, standardizing intake workflows and eliminating multi-platform navigation friction.
- Leveraged Lean Digital Transformation principles, applying Value Stream Mapping and 5-Why RCA to identify operational bottlenecks and enhance team workflow throughput.

Resource Coordinator (Microsoft EMEA Operations) — Majorel Feb 2018 – Dec 2021 | Braşov, Romania
Focus: End-to-end technical engagement lifecycle, dispatch management, and queue optimization for Microsoft service lines.

- Governed the end-to-end service engagement lifecycle for enterprise resource requests across Microsoft EMEA service portfolios, reviewing, validating, and approving technical allocations against project criteria.
- Administered dedicated Microsoft Dashboard applications to monitor real-time queue capacity, balance workload distribution, and track engineer availability across diverse service disciplines.
- Analyzed technical competency matrices to match specialized engineering talent with high-impact customer escalations, ensuring rapid deployment and contract SLA compliance.
- Served as a senior operational point of contact for staffing and assignment escalations, collaborating cross-regionally with Microsoft project leads across the EMEA theatre.

Technical Support Specialist (Bolt Application) — Arvato Bertelsmann Feb 2019 – Feb 2020 | Braşov, Romania
Focus: Front-line technical support, application troubleshooting, account provisioning, and incident escalation.

- Provided end-to-end technical and customer support for the Bolt mobile and web platform, investigating and resolving application glitches, route-tracking anomalies, and billing/ticket discrepancies.
- Troubleshot user account, onboarding, and registration issues, guiding drivers and riders through app configuration, permissions, and network-related connectivity troubleshooting.
- Managed multi-channel ticket queues in a fast-paced environment, meeting stringent first-contact resolution (FCR) and response time SLAs while maintaining superior CSAT scores.
- Documented reproducible software bugs and escalated edge cases to second-tier technical support and operations engineering adhering to standardized support runbooks.

Full-Stack & React Technical Support Specialist — Freelance (Upwork & Fiverr) Feb 2019 – Dec 2024 | Remote
Focus: Tier 2/3 technical troubleshooting, front-end architecture, API integration debugging, and user onboarding.

- Diagnosed, debugged, and resolved critical defects in complex JavaScript, TypeScript, React.js, and Node.js applications for international business clients.
- Conducted deep diagnostics using Chrome DevTools, network logs, and Postman to pinpoint and resolve API failures, CORS misconfigurations, JSON parsing defects, and state errors.
- Integrated RESTful web services and GraphQL endpoints with NoSQL/SQL databases (MongoDB, MySQL), ensuring robust error handling, validation, and data consistency.
- Provided responsive post-deployment technical support, writing clear setup guides and troubleshooting manuals to assist non-technical users and IT teams.

Focus: Data reconciliation, workflow reporting automation, financial control, and process integrity.

- Maintained precise operational expenditure records, executing monthly ledger reconciliations, balance sheet audits, and journal entries with zero discrepancy tolerances.
- Engineered advanced Microsoft Excel automation models leveraging Power Query, XLOOKUP, and dynamic Pivot Tables, accelerating monthly financial and operational close routines.

Focus: CMS troubleshooting, theme configuration, script conflicts, and customer technical assistance.

- Resolved client-reported site crashes, database connection dropouts, runtime exceptions, and plugin script conflicts, providing documentation for ongoing maintenance.

TECHNICAL PROJECTS & OPERATIONAL SOLUTIONS

Enterprise WBR Reporting & Visualization Hub
Google Apps Script | Google Sheets API | Google Sites | JavaScript
Engineered an automated data extraction and visualization utility that aggregates weekly performance metrics across content queues. Replaced manual spreadsheet updates with real-time KPI data feeds, reducing executive dashboard generation time by 75% and minimizing human reporting error.

Full-Stack Application Diagnostics & Redux State Debugging
React.js | Redux Toolkit | Node.js | REST APIs | Postman
Diagnosed and resolved race conditions, memory leaks, and serialization errors in dynamic web portals. Implemented client-side caching and standard HTTP error interceptors, decreasing customer-reported incident tickets by 40% across deployed environments.

CERTIFICATIONS, EDUCATION & LANGUAGES

LICENSES & CERTIFICATIONS

- Lean Certification (Digital Transformation)**
Genpact · Credential ID: 2623686 · Issued 2026
Continuous improvement, Value Stream Mapping (VSM), Root Cause Analysis (RCA), operational waste elimination.
- AI Fluency: Framework & Foundations**
Anthropic · Issued 2026
AI model concepts, prompt optimization, workflow synthesis, and foundation model operations.
- Modern Web Development Bootcamp (Full-Stack)**
Udemy · Full-Stack Web Development
REST architecture, Node.js backend runtimes, database schemas, full lifecycle deployment.
- JavaScript Algorithms and Data Structures**
freeCodeCamp · Issued Dec 2021
Algorithm design, complex data structures, algorithmic debugging, ES6+ standards.
- ReactJS, Redux & React Router Architecture**
Udemy · Issued 2021
State management diagnostics, component lifecycle optimization, SPA architecture.
- JavaScript: Understanding the Weird Parts**
Udemy · Advanced JS Engine Internals
Execution contexts, closures, prototypal inheritance, asynchronous event loops.

EDUCATION

- Bachelor's Degree in Commerce**
Ain Shams University
Cairo, Egypt · Conferred: 2010
Focus on Business Operations, Accounting Standards, and Financial Systems.

Diploma in Information Technology
Advanced Technical School for IT
Cairo, Egypt · Conferred: 2005
Foundations in computer hardware, networking concepts, OS, and systems logic.

LANGUAGES

- **Arabic:** Native or Bilingual Proficiency
- **English:** Full Professional Working Proficiency (Technical Support & Client-Facing)
- **German:** Elementary Proficiency (A1/A2)

KEY STRENGTHS FOR MICROSOFT

- Proven Microsoft EMEA partner service background
- Dedicated application support background (Bolt / Arvato)
- Deep cross-stack technical & API debugging ability
- Certified Lean and RCA problem-solving methodology
